CANNED POULTRY
May 1951

The quantity of poultry canned or used in canning during May totaled 17,103,000 pounds, the Bureau of Agricultural Economics reports. This quantity was 31 percent larger than was canned during May last year and 39 percent larger than the 1945-49 average for the month. The quantity canned during the first 5 months of this year totaled 82,659,000 pounds compared with 60,024,000 pounds during the same period last year -- an increase of 38 percent.

The quantity of poultry certified under Federal inspection during May totaled 45,017,000 pounds. Of this, 16,569,000 pounds were for canning and 28,448,000 pounds were eviscerated for sale. Of the quantity inspected during May last year, 12,587,000 pounds were for canning and 17,929,000 pounds were eviserated for sale.
